***Defective Oath/Declaration***

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following: The specific changes/amendments to the claims must also be identified in the declaration, in addition to the errors in the original claims.

In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Claims 1-138 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

"Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant."

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 119-124, 135-137 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones (5,088,214) in view of Jones et al. (4,433,496).

Jones '214 discloses a wear assembly having all of applicant's claimed structure including a boss 29, a wear member including a longitudinal slot, and a lock 38. Jones '214 however lacks the lock including an adjustment assembly movable to tighten the mounting of the wear member on the lip.

Jones et al. '496 teaches that it is known in the art to use a lock including an adjustment assembly movable to tighten the fit of the lock and eliminate looseness in the wear assembly.

It would have been obvious to one of ordinary skill in the art at the time the invention was made, to modify the wear assembly of Jones (5,088,214) by using a lock with an adjustment assembly as taught by Jones et al. '496, to eliminate looseness in the wear assembly.

### ***Response to Arguments***

Applicant's arguments filed 5/17/04 have been fully considered. Applicant's arguments regarding claims 125 & 129 are considered persuasive. Applicant's arguments regarding claim 119 are not persuasive. Applicant argues that one of ordinary skill in the art would not have considered it obvious to add extra parts and extra assembly steps for performing the same functions as already being performed by the simple lock in the '214 patent. The examiner disagrees. Although, there are extra parts associated with the lock disclosed in Jones '496 patent, it is also disclosed in Jones '496 that the wedge type lock provides a tight or snug fit that is also easily releasable. Therefore, Jones '496 discloses advantages associated with the lock that would justify the use of extra parts.

Applicant further argues that there is no suggestion in the '496 patent that the addition of the bolt and wedge to the '214 patent would be beneficial.

In response, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the knowledge generally available to one of ordinary skill in the art was used.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
